REVERSE OSMOSIS SYSTEM

highest quality drinking water

- ❖ clean & delicious
- ❖ 5 stage purification system
- ❖ reduces odors
- ❖ reduces contaminants
- ❖ easy installation
- ❖ fits under kitchen sink

AT YOUR FINGERTIPS
Natural & clean

ValueLine RO

If you want...

High Quality Drinking Water, Clear & Clean Ice Cubes,
Delicious Coffee, Tea & Beverages, and Water for Pets & Plants.

Ice cubes, lemonade,

popsicles, baby formula,

soups, steamed veggies,

pets, plants, aquariums.

Five Stage Purification Process

Stage 1 **5 Micron Sediment Filter:** Removes dirt, sediments, sand, and other physical particles.

Stage 2 **Carbon Block:** Reduces chemicals such as chlorine, that may be present in your water supply.

Stage 3 **2ND Carbon Block:** Further reduces organics, odors, and other chemicals that might be present in your water supply.

Stage 4 **Reverse Osmosis Membrane:** 50 gallon per day membrane removes 93-97% of dissolved mineral salts and other contaminants in the water supply.

Stage 5 **Post Carbon Filter:** A final polishing process that enhances and clarifies your drinking water.

ValueLine Reverse Osmosis System

Reverse Osmosis is the most effective and economical way to provide your family with high quality drinking water. Reverse Osmosis is the process by which water molecules are forced by your household water pressure through a semi-permeable membrane. Contaminants are rinsed to the drain while your high quality filtered water is stored in the holding tank.

Max. Total Dissolved Solids
Water Temperature Range
Water Pressure Range
Allowable pH Range

no more than 2000ppm
40-85° F
40-80 psi
4-11

Maximum Manganese
Maximum Iron
Hydrogen Sulfide
Bacteria

no more than 0.05ppm
no more than 0.1 ppm
must not be present
water source must be potable
